

Keep NYC Congestion Tax Free

Statement by
Walter L. McCaffrey
on behalf of
Keep NYC Congestion Tax Free

“We look forward to working with the congestion pricing commission in the months ahead. We are hopeful that its workings will be fair, open and objective.

We trust its members will seek to address the problems of traffic congestion while at the time heeding the economic needs of working class individuals and seniors who must travel by car and truck into Manhattan. We also trust that the commission will take under consideration all mitigation options.

We still believe that congestion relief programs can be both effective and fair.”
